## series

## - Industrial Motion

TiMOTION's MA2 series linear actuator was specifically designed for applications which face harsh working environments and require ruggedness and durability. Its IP69K protection ensures it will withstand high pressure water jets, and the ingress of dust and other solid contaminants. The MA2 also has optional Reed switches along the outer tube which allow users to adjust the stroke length. For improved control and accuracy of motion, the MA2 can be customized with many different feedback options depending on your application requirements. Example applications suitable for the MA2: Agricultural equipment such as spreaders, harvesters, grain handlers, combines and tractors.
Commercial and industrial applications such as commercial lawn mowers, scrubbers and sweepers, material handling equipment and livestock ventilation systems.

## General Features

Voltage of motor

Maximum load
Maximum speed at full load
Stroke
Minimum installation dimension
IP rating
Certificate
Operational temperature range
Operational temperature range
at full performance
Options

12V DC, 24V DC, 36V DC;
$12 \mathrm{~V} D, 24 \mathrm{~V} D \mathrm{C}, 36 \mathrm{~V}$ DC (thermal control)
$6,000 \mathrm{~N}$ in push and pull
$43 \mathrm{~mm} / \mathrm{s}$ (with 1000 N in a push or pull condition)
$\geq 25 \sim 1000 \mathrm{~mm}$
$\geq$ Stroke +131 mm
Up to IP69K
UL73, EMC
$-25^{\circ} \mathrm{C} \sim+65^{\circ} \mathrm{C}$
$+5^{\circ} \mathrm{C} \sim+45^{\circ} \mathrm{C}$

Hall sensors, POT, manual drive, Reed sensor on the outer tube

## Note

## Load and Speed

| CODE | Load (N) |  | Self Locking Force (N) | Typical Current (A) |  | Typical Speed (mm/s) |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Push | Pull |  | No Load $24 \mathrm{~V} \text { DC }$ | With Load 24V DC | No Load 24V DC | With Load 24V DC |
| Motor Speed (5200RPM, duty cycle 25\%) |  |  |  |  |  |  |  |
| F | 1000 | 1000 | 1000 | 2.7 | 8.4 | 52.5 | 43.0 |
| G | 2000 | 2000 | 2000 | 2.4 | 7.5 | 25.5 | 22.3 |
| H | 4000 | 4000 | 4000 | 2.3 | 8.0 | 13.2 | 11.1 |
| J | 6000 | 6000 | 6000 | 2.0 | 6.8 | 6.6 | 6.1 |

## Note

1 Please refer to the approved drawing for the final authentic value.
2 This self-locking force level is reached only when a short circuit is applied on the terminals of the motor. All the TiMOTION control boxes have this feature built-in.

3 The current \& speed in table are tested with 24 V DC motor. With a 12 V DC motor, the current is approximately twice the current measured in 24 V DC. With a 36V DC motor, the current is approximately two-thirds the current measured in 24 V DC. Speed will be similar for all the voltages.

4 The current \& speed in table are tested when the actuator is extending under push load.
5 The current \& speed in table and diagram are tested with a stable 24 V DC power supply.
6 Standard stroke: Min. $\geq 25 \mathrm{~mm}$, Max. please refer to below table.

| CODE | Load (N) | Max Stroke (mm) |
| :--- | :--- | :--- |
| H, J | $\geq 4000$ | 600 |
| G | $=2000$ | 800 |
| F | $<1000$ | 1000 |
